To whom it may concern,

Subject: Declaration of Pre-Approved Radio Module Integration

We, Fluke Corporation, hereby declare that the finished product listed below incorporates a pre-approved radio module that has been certified in accordance with applicable radio regulations.

Product Information:

Brand	Model Number	Description	PN
Fluke	FLK-a3001 FC	Wireless iFlex® AC Current Module	4459439
Fluke	FLK-a3004 FC	Wireless 4-20 mA DC Clamp Meter	4629301

Radio Module Information:

- Radio Module Manufacturer: Fluke Electronics
- Module Model Number: FBLE
- Technology: BT Classic
- FCC ID: T68-FBLE

We confirm the following:

1. The above-referenced radio module has been integrated into the Fluke finished product without any modification to the RF circuitry or antenna characteristics of the certified module.
2. The radio parameters (frequency bands, output power, modulation, and RF characteristics) remain unchanged from those evaluated during the original certification of the module.
3. The host product does not alter, control, or modify the RF operating parameters of the certified radio module.
4. All RF functionality is performed by the pre-approved radio module, and integration into the host product does not affect the compliance of the module with applicable radio regulations.
5. The original test reports and certification documents for the radio module are provided as part of the supporting documentation.

This declaration is issued to support regulatory documentation requirements for the finished product.

Sincerely,

A handwritten signature in black ink that reads "Thomas L. Smith". The signature is written in a cursive, flowing style.
