Regarding: **Product Overview and Certification Reference**

This document provides clarification regarding the use of the IR3000FC Wireless Connector with the 1550C FC and 1555C Digital insulation resistance tester products.

The IR3000FC is a wireless communication accessory that is supplied as part of the kit with the 1550C FC and 1555C products. This device enables wireless data transfer functionality and operates as an independent radio module.

Please note the following:

- The IR3000FC Wireless Connector is a separately certified product.
- It holds its own FCC certification and corresponding FCC ID: T68-IRFBLE.
- The radio design, RF characteristics, and compliance of the IR3000FC are fully covered under its standalone certification.
- The host products (1550C FC and 1555C) do not incorporate or modify the radio circuitry of the IR3000FC.

Therefore, the applicable certification documentation, including test reports and regulatory details specific to the IR3000FC, should be referenced for the 1550C FC and 1555C products.

Sincerely,
