Regarding: Product Overview and Certification Reference

This document provides clarification regarding the regulatory applicability of test reports and certifications associated with the Fluke Networks LinkIQ Duo Cable+Network+Wi-Fi Tester Unit to all related kits.

The LIQ-DUO is the primary unit that contains the integrated Wi-Fi radio and all associated RF circuitry. It serves as the main communication unit for all the kits.

Please note the following:

- The LIQ-DUO is equipped with a Wi-Fi 6E module (Ezurio Sona IF573) and supports WLAN technologies in the 2.4GHz, 5 GHz, and 6 GHz bands.
- The LIQ-DUO unit holds FCC certification under FCC ID: T68-LINKIQ.
- The LIQ-DUO includes multiple kits and various accessories; however, only the main LIQ-DUO unit contains a radio, and none of the kits include any radio transmitters.
- All RF-related characteristics, including frequency, output power, and emissions are defined and controlled by the LIQ-DUO unit.
- The kits do not alter, modify, or impact the RF performance of the LIQ-DUO unit.

All regulatory evaluations have been performed on the LIQ-DUO Unit. Therefore, the applicable certification documentation, including all RF test reports and regulatory approvals associated with the LIQ-DUO Unit, are valid and applicable to all product model kits that utilize this main unit, as they do not impact on the RF characteristics or compliance status of the system.

The following are the kits come with the LIQ-DUO Main Unit:
