Regarding: Product Overview and Certification Reference

This document provides clarification regarding the regulatory applicability of test reports and certifications associated with the Fluke 283FC/PV Kit (P/N:6019841), which consists of two individually certified products: 283FC and A283FC.

The 283FC/PV kit includes the following products and its radio modules:

Brand	Model Name/Number	Part Number	Radio Modules	Technology
Fluke	Fluke-283FC	5593158	TTBLE (FCC ID: T68-TTBLE) FBLE (FCC ID: T68-FBLE)	Bluetooth LE Bluetooth Classic + BR/EDR
Fluke	Fluke-A283FC	5593251	TTBLE (FCC ID: T68-TTBLE)	Bluetooth LE

Please note the following:

- 283FC and A283FC are independent products and each holds their own separate regulatory documentation, certifications, and test reports.
- All applicable regulatory and compliance documentation for 283FC and A283FC are maintained separately and provided individually for each product.
- The 283FC/PV Kit is a bundled sales package containing both products; however, the kit itself does not introduce any additional RF functionality or modify the radio characteristics of either device.
- All RF-related characteristics, including operating frequency, output power, and emissions, remain unchanged from the individually certified products.

Therefore, the applicable certification documentation, including all RF test reports and regulatory approvals associated with 283FC and A283FC, remain valid and applicable when these products are sold together as part of the 283FC/PV Kit, since the bundled kit configuration does not alter the RF characteristics or compliance status of either product.

Sincerely,
