Regarding: Product Overview and Certification Reference

This document provides clarification regarding the regulatory applicability of test reports and certifications associated with the Fluke a3001 FC Wireless iFlex® AC Current Clamp Kit (P/N:4465665), which consists of two individually certified products: 3000 FC and a3001 FC.

The 283FC/PV kit includes the following products and its radio modules:

Brand	Model Name/Number	Part Number	Radio Modules	Technology
Fluke	FLK-3000 FC	4401595	FCC ID: T68-DMFBLE	Bluetooth LE
Fluke	FLK-a3001 FC	4459439	FBLE (FCC ID: T68-FBLE)	Bluetooth LE

Please note the following:

- 3000 FC and a3001 FC are independent products and each holds their own separate regulatory documentation, certifications, and test reports.
- All applicable regulatory and compliance documentation for 3000 FC and a3001 FC are maintained separately and provided individually for each product.
- The a3001 FC Kit is a bundled sales package containing both products; however, the kit itself does not introduce any additional RF functionality or modify the radio characteristics of either device.
- All RF-related characteristics, including operating frequency, output power, and emissions, remain unchanged from the individually certified products.

Therefore, the applicable certification documentation, including all RF test reports and regulatory approvals associated with 3000 FC and a3001 FC, remain valid and applicable when these products are sold together as part of the a3001 FC Kit, since the bundled kit configuration does not alter the RF characteristics or compliance status of either product.

Sincerely,
