Regarding: Product Overview and Certification Reference

This document provides clarification regarding the regulatory applicability of test reports and certifications associated with the Fluke SMFT-1000 Solar Tools Pro Kit (P/N:5416417), which consists of two individually certified products: SMFT-1000 and IRR2-BT.

The 283FC/PV kit includes the following products and its radio modules:

Brand	Model Name/Number	Part Number	Radio Modules	Technology	Antenna Model Type
Fluke	FLK-SMFT-1000/KIT	5280005	FCC ID: SQGBL653	Bluetooth LE	Printed PCB (1.28 dBi)
Fluke	FLK-IRR2-BT	5279986	FCC ID: SQGBL653	Bluetooth LE	Printed PCB (1.28 dBi)

Please note the following:

- SMFT-1000/KIT and IRR2-BT are independent products, and each holds their own separate regulatory documentation, certifications, and test reports.
- All applicable regulatory and compliance documentation for SMFT-1000/KIT and IRR2-BT are maintained separately and provided individually for each product.
- The SMFT-1000 Pro Kit is a bundled sales package containing both products; however, the kit itself does not introduce any additional RF functionality or modify the radio characteristics of either device.
- All RF-related characteristics, including operating frequency, output power, and emissions, remain unchanged from the individually certified products.

Therefore, the applicable certification documentation, including all RF test reports and regulatory approvals associated with SMFT-1000/KIT and IRR2-BT, remain valid and applicable when these products are sold together as part of the SMFT-1000 Pro Kit, since the bundled kit configuration does not alter the RF characteristics or compliance status of either product.

Sincerely,
