To whom it may concern,

Subject: Declaration of Pre-Approved Radio Module Integration

We, Fluke Corporation, hereby declare that the finished product listed below incorporates two pre-approved radio modules that have already been certified in accordance with applicable radio regulations.

Product Information

- Product Name: Fluke 500 Series Battery Analyzer
- Model Number: Fluke BT521
- Brand: Fluke

Radio Module 1 Information

- Module Manufacturer: Fluke Electronics
- Module Model Number: FWCS
- Technology: Zigbee
- FCC ID: T68-FWCS

Radio Module 2 Information

- Module Manufacturer: Blue Radios, Inc
- Module Model Number: BR-LE4.0-S2A
- Technology: Bluetooth LE
- FCC ID: XDULE40-S2

We confirm the following:

1. The above-referenced radio modules have been integrated into the Fluke finished product without any modification to the RF circuitry or antenna characteristics of the certified module.
2. The radio parameters (frequency bands, output power, modulation, and RF characteristics) remain unchanged from those evaluated during the original certification of the module.
3. The host product does not alter, control, or modify the RF operating parameters of the certified radio module.
4. All RF functionality is performed by pre-approved radio modules, and integration into the host product does not affect the compliance of the module with applicable radio regulations.
5. The original test reports and certification documents for the radio modules are provided as part of the supporting documentation.

This declaration is issued to support regulatory documentation requirements for the finished product.

Sincerely,

Name: Thomas Smith
